Anubhav Acharya

Computer Engineering Student - 4th year

I am just a basic programmer with basic knowledge of some programming languages and want to test my skills and gain experience by doing internship.

ACHIEVEMENTS

Scholarship In 3rd Semester

In my third semester of computer engineering, I was awarded a scholarship for being the top student in my college. It was a testament to my hard work and dedication, motivating me to continue excelling in my studies.

EXPERIENCE

Freelancer

Upwork / April, 2021 - February, 2023

I freelanced on Upwork for two years, starting with basic typing work and gradually transitioning to frontend development projects. I gained proficiency in HTML, CSS, and JavaScript, delivering visually appealing websites and applications. Communication and client satisfaction were paramount in my approach, allowing me to build strong relationships. My experience on Upwork equipped me with adaptability, continuous learning, and a diverse skill set.

PROJECTS

FOODOTO: THE FOOD RECOGNIZING APP

In my third year of computer engineering, I completed a minor project called "FOODOTO." It was a web application designed to recognize food images and provide calorie information for a 100g serving of the identified food. The aim of this project was to help individuals maintain their fitness by providing basic information about the calories they were consuming. FOODOTO enabled users to make informed decisions about their dietary intake and promote a healthier lifestyle.
